#Summary

I am an aspiring developer with a growth mindset. I'm currently in the middle of a three-month (more than 400 hours) "Generation USA" Web Developer Program. I helped local businesses in boosting their revenue by developing a layout responsive website and applying SEO good techniques. I use HTML5, CSS, JavaScript, jQuery, React.js, Node.js, and various web technologies to create an interactive web application within budget and on time.

#Skills

Front-End	Back End	Source Control	Frameworks	CMS
JavaScript ES6/ jQuery	Node/NPM	Git(Git Flow)	React/Redux	Wordpress
CSS3/SASS	REST API/Express	Git Hub	Bootstrap	Shopify
HTML5/XHTML	MySQL/MongoDB	CLI		
JSX	MVC/XML/JSON	Bash Script		

#Professional Experience

DCNine Web Solutions / Full Stack Developer, Arlington, VA

Feb 2019 – Present

- Developed a website for the [Ethiopian shopping market](#) with the goal of projecting a better brand image and increasing annual revenue by 25%.
- Developed a dynamic front-end using a modern JavaScript library to create single-page apps using React.js([see portfolio](#)).
- Performed within a team using an agile development methodology and widely accepted collaboration practices using Git Flow.
- Safely modeled and stored data in SQL databases.
- Wrote secure applications and deployed them to a web hosting server.
- Worked with a talented team of backend developers.

Freelance / Frontend Developer

June 2017 – August 2018 | VA, USA

- Collaborated with clients/content owners to understand their requirements, manage expectations, and

develop a web solution for new websites and enhance existing websites with advanced SEO techniques.

- Implemented layout responsive web applications.

Personal Projects

- Built [real-time chat app replica](#) using React.js, Socket.io, and Node.js which lets users join a chat session with a room id and send and receive messages.
- Followed a live youtube coding to build [an expense tracker app](#) using React.js Context API, Speechly voice API, and Node.js which lets users join a chat session with a room id and send and receive messages.
- [Amazon-Clone](#) a Full-stack project built with Node.js, react.js, firebase, and stripe. • Recreated responsive live website of apple.com using React.js and integrated Apple's YouTube channel with the website using API. View code on [GitHub](#).

#Education

University of Gondar / Bachelor's Degree/Business-Commerce
