Professional Experience

DCNine Web Solutions / Full Stack Developer, Arlington, VA | February 2019 – Present

- Developed a website for the Ethiopian shopping market with the goal of projecting a better brand image and increasing annual revenue by 25%.

- Developed a dynamic front-end using a modern JavaScript library to create single-page apps using React.js(see portfolio).

- Performed within a team using an agile development methodology and widely accepted collaboration practices using Git Flow.

- Safely modeled and stored data in SQL databases.

- Wrote secure applications and deployed them to a web hosting server.

- Worked with a talented team of backend developers.

Freelance / Frontend Developer Springfield, VA, | June 2017 – August 2018

- Collaborated with clients/content owners to understand their requirements, manage expectations, and

develop a web solution for new websites and enhance existing websites with advanced SEO techniques.

• I have been building websites, designing wireframes, and constructing web applications for almost 2 years.

Personal Projects

• Built [real-time chat app replica](#) using React.js, Socket.io, and Node.js which lets users join a chat session with a room id and send and receive messages.

• Followed a live youtube coding to build [an expense tracker app](#) using React.js Context API, Speechly voice API, and Node.js which lets you track your income expense for different categories.

• [Amazon-Clone](#) a Full-Stack project built with Node.js, react.js, firebase, and stripe. • Recreated responsive live website of apple.com using React.js and integrated Apple's YouTube channel with the website using API. View code on [GitHub](#).
