# #Summary

I am an aspiring developer with a growth mindset. I'm currently in the middle of a three-month (more than 400 hours) "Generation USA" Web Developer Program. I helped local businesses in boosting their revenue by developing a layout responsive website and applying SEO good techniques. I use HTML5, CSS, JavaScript, jQuery, React.js, Node.js, and various web technologies to create an interactive web application within budget and on time.

# #Skills

| Front-End | Back End | Source Control | Frameworks | CMS |
|---|---|---|---|---|
| JavaScript ES6/ jQuery | Node/NPM | Git(Git Flow) | React/Redux | Wordpress |
| CSS3/SASS | REST API/Express | Git Hub | Bootstrap | Shopify |
| HTML5/XHTML | MySQL/MongoDB | CLI | | |
| JSX | MVC/XML/JSON | Bash Script | | |

# #Professional Experience

**DCNine Web Solutions / Full Stack Developer, Arlington, VA**          Feb 2019 – Present

- Developed a website for the Ethiopian shopping market with the goal of projecting a better brand image and increasing annual revenue by 25%.

- Developed a dynamic front-end using a modern JavaScript library to create single-page apps using React.js(see portfolio).

- Performed within a team using an agile development methodology and widely accepted collaboration practices using Git Flow.

- Safely modeled and stored data in SQL databases.

- Wrote secure applications and deployed them to a web hosting server.

- Worked with a talented team of backend developers.

**Freelance / Frontend Developer**

June 2017 – August 2018 | VA, USA

- Collaborated with clients/content owners to understand their requirements, manage expectations, and

develop a web solution for new websites and enhance existing websites with advanced SEO techniques.

• Implemented layout responsive web applications.

**Personal Projects**

• Built real-time chat app replica using React.js, Socket.io, and Node.js which lets users join a chat session with a room id and send and receive messages.

• Followed a live youtube coding to build an expense tracker app using React.js Context API, Speechly voice API, and Node.js which lets you track your income expense for different categories.

• Amazon-Clone a Full-Stack project built with Node.js, react.js, firebase, and stripe. • Recreated responsive live website of apple.com using React.js and integrated Apple's YouTube channel with the website using API. View code on GitHub.
